Hi all, I did a search and found a little about this issue. I have a 2000 Jetta with VR6. I have been having issues with the immobilizer going off. I didn't realize that I have had the same on going issue for a year. This is usually my summer vehicle and it was doing the same thing at the end of the summer as it is doing now. It will start and run.

June 15, 2010 in New York Volkswagen introduced a new model – Jetta VI, which, according to the developers, unlike previous models, with VW Golf has nothing to do. The following year, after the launch of the VW Golf, new body variants for this car were developed (in order to increase the luggage space) in the style of a classic sedan.

Weather you've supped up your 2000 Jetta VR6 or you've left it the same as the day you drove it off of the lot you know that your Jetta VR6 is capable of more than a standard Jetta Model. With performance engines come extra maintenance and this is especially true with the cooling system. Performance engines run hotter and when the engine's thermostat fails the engine can warp or even crack ...
