Finding objective data for measuring agile performance. Answering performance questions with data you're generating. Adopting agile performance measurement. There isn't a silver-bullet metric that will tell you if your agile teams are performing as well as they can. Performance improvement is made possible by incorporating what you learn about your team's performance into how your team operates at regular intervals.

Value-Based Agile Metrics A more productive way to measure agile is to focus on (and measure) the value agile can bring you. This is not to say that agile development metrics like velocity and quality should not be measured—far from it. These data points are useful but shouldn't be the end goal.

~~Metrics that Matter: How You Should Be Measuring Agile~~...

The metrics in Agile project management are one of the main aspects which transformed the way knowledge work teams measure their projects. They represent performance indicators related to outcomes that allow teams to reflect on what happened in their process and make data-driven decisions for future actions.

Metrics are agreed-upon measures used to evaluate how well the organization is progressing toward the portfolio, large solution, ART, and team's business and technical objectives. With its focus on objective evaluation of working systems, cadence-based development, continuous delivery, DevSecOps and connected Kanban systems, SAFe creates an inherently measurable process.

~~Metrics - Scaled Agile Framework~~

According to the State of Agile survey, 58% of the respondents\* said they measured the success of their agile initiatives by on-time delivery. With agile, our schedule is fixed and our scope is flexed. What does that mean for on-time? Well, time just happens, so theoretically, we are always on time.

Agile metrics also track how cloud solutions deliver on their promise of low initial investment to enable experimentation, high developer autonomy to provide agility, and instant scale to accommodate growth and business rhythms.

~~Measuring Agile productivity with Agile metrics - Applio~~

Business metrics focus on whether the solution is meeting the market need, and agile metrics measure aspects of the development process. A program's business metrics should be rooted in its roadmap. For each initiative on the roadmap, include several key performance indicators (KPIs) that map to the program's goals.
