They perform well in physical therapy, but no real motor learning has occurred. Despite sound orthopedic interventions, these patients display little carryover from the clinic to their daily lives. Why? Because we have forgotten about neuroscience.

Online Library Applied Motor

Drawing on neuroscience can enhance the way we practice as orthopedic physical therapists. The brain drives our movements and is responsible for our ability to learn a new skill.

Motor Control and

Learning -

Physiopedia

Motor learning is a

subdiscipline of motor

behavior that

examines how people

acquire motor skills.

Motor learning is a

relatively permanent

change in the ability

to execute a motor

skill as a result of

practice or

Online Library Applied Motor
