Biomaterials

Biointegration of Medical Implant Materials / ScienceDirect

Abstract All materials intended for application in humans as biomaterials, medical devices, or prostheses undergo tissue responses when implanted into living tissue. Similarly, when blood contacts a biomaterial surface, a variety of blood components interfere with the surface leading to thrombosis or complement activation.

Biomaterials

Biointegration of Medical Implant Materials: Science and ...

Biointegration has been defined as an interconnection between a biomaterial and the recipient tissue at the microscopic level. This implant-to-tissue interface could be a distinct boundary or a zone of interaction between the corresponding biomaterial and tissue.
