Answers is additionally useful. One type of ecosystem change, called (13), results in one community replacing another over time. Light is especially key for a completely distinct avian community.

Community Ecology

Answer Key

*Page 18/25*

Read PDF

Biology

A community is defined as an assemblage of species living close enough together for potential interaction.

Communities differ in their species richness, the number of species they contain, and the relative abundance of different species.

Concept 53.1 A community's interactions include
