The Bosch Continuous Injection System (CIS) is a hydraulic-type fuel injection system which uses an air flow sensor, that is mechanically connected to a hydraulic valve, to control injection quantity. The Lambda system is a feedback control capable of measuring air/fuel ratios and constantly correcting them.

Bosch K-Jetronic seems to be a bit of a black art these days. Almost anyone you mention it to backs off and cringes. Hopefully this series of posts clears up some of that misinformation and scaremongering, and opens more people up to working with their KJet instead of binning it, or neglecting it until it inevitably fails.

Bosch introduced the CIS-E (Electronic) fuel in jection system in the early '80's on some Audi, Volkswagen, and MercedesBenz models, as well as other European cars. The change to CIS-E followed the normal evolution of the fuel injection systems we had become familiar with—CIS, CIS-Lambda, then CIS-E. Stricter emissions standards were at

This little goody is a common culprit in K-jet or CIS problems, along with pumps, one-way valves, accumulators and fuel distributors. Having recently sorted out a problem with mine, and hopefully understanding its workings now, with help from Jay Kempf, I think a few pictures and text might help others to have the confidence to attack this guy.
