Bridging the evidence gap is an important part of evidence-based practice. Evidence is inconclusive in many areas of catheter care. Few trials consider patient satisfaction and comfort. Nurses need to listen to patients and draw on clinical expertise, particularly where the evidence is not clear. References.

AstraZeneca is investing its scientific energy into studies of this nature to ensure that real world data can be used to bridge the gap between clinical trial data and real world patients. The impetus for the study was one of sheer necessity, says Sajan Khosla, Head of Real World Evidence at AstraZeneca – a bid to address the gap created by the inherent time lag of RCTs.
