At last academics are starting to seriously challenge the always flaky notion that 'government' had been superseded by 'governance' - networked, decentered, multi-layered, etc. this is a good contribution to this emerging literature.

Challenging governance theory: From Networks to Hegemony ...
Mark Bevir, University of California, Berkeley "Jonathan Davies has written a robust critique of network governance theory, its circulation and the way it influences practice. Developing an incisive Gramscian governance agenda, he contests the scope of the transformation associated with government networks.

Challenging Governance Theory: From Networks to Hegemony
This chapter explores key themes in the critical literatures, highlighting the empirical basis for a critique of network governance theory: that it misreads both past and present, that governance networks are prone to resolving into hierarchies and incremental closure, that they reproduce inequalities, and that distrust is common.

Challenging Governance Theory: From Networks to Hegemony
Theories heralding the rise of network governance have dominated for a generation. Yet, empirical research suggests that claims for the transformative potential of networks are exaggerated. This topical and timely book takes a critical look at contemporary governance theory, elaborating a Gramscian alternative.

rethinking post-traditional governance theory is therefore to determine why governance networks do not live up to the promise of Znetwork governance. Encouragement for this enterprise has recently...

Challenging Governance Theory: From Networks to Hegemony
The theory of (network) governance invariably comes up with an amplified claim of involvement, or rather participation, of more and more actors, laterally bound to each other in the hallowed task of governance. This claim by itself adds a 'post hegemonic' and democratic shine to the idea and practice of network governance.

Challenging governance theory : From networks to hegemony ...
Influential governance theories argue that we live increasingly in a world of networks either relegating hierarchy to the shadows or dismissing it altogether. This paper develops a Gramscian critique of these currents, advancing two key arguments. First, drawing on Gramsci's concepts of hegemony and passive revolution, it reinterprets the cultivation of networks as a prominent element in the hegemonic strategies of Western neoliberalism, exemplified by UK public policy.

Network Governance Theory: A Gramscian Critique - Jonathan ...

Network governance is "interfirm coordination that is characterized by organic or informal social system, in contrast to bureaucratic structures within firms and formal relationships between them. The concepts of privatization, public private partnership, and contracting are defined in this context." Network governance constitutes a "distinct form of coordinating economic activity" which contrasts and competes with markets and hierarchies.
