The five basic principles of infection control are using personal protective equipment (PPE), disinfecting surfaces and equipment, good personal hygiene, careful wound care and treating underlying diseases. Bacteria, viruses and fungi can all cause types of infection, and you need to protect yourself at work. This is especially important if you work in healthcare organisations like hospitals.

Chapter 5 Infection Control: Principles And Practices ...

There is nothing that can scare people more than the knowledge that there is a new virus or infection, and no one has an idea on how it is spread, or it is spread at all. This is why practitioners aim to find this out first before they can look for a cure as we continue to learn about infection control, we covered principles and practices surrounding it. Take this quiz and see how much you ...
