Cisco Networking Academy Chapter 4 Test Answers

1. Which two statements are true regarding network security? (Choose two.) Securing a network against internal threats is a lower priority because company employees represent a low security risk. Both experienced hackers who are capable of writing their own exploit code and inexperienced individuals who download exploits from the Internet pose a serious threat to network security.

A router defines a broadcast boundary, so every link between two routers is a broadcast domain. In the exhibit, 4 links between routers make 4 broadcast domains. Also, each LAN that is connected to a router is a broadcast domain. The 4 LANs in the exhibit result in 4 more broadcast domains, so there are 8 broadcast domains in all.
