## **Earth Science Geology, the Environment, and the Universe**

Geology is the primary Earth science. The word means "study of the Earth." Geology deals with the composition of Earth materials, Earth structures, and Earth processes. It is also concerned with the organisms of the planet and how the planet has changed over time. Geologists search for fuels and minerals, study natural hazards, and work to protect Earth's environment.

### **Earth Science Geology, the Environment, and the Universe ...**

Environmental Science provides an overview of how science affects our environment. We focus on interactions between the solid Earth, its water, its air and its living organisms, and on dynamic, interdependent relationships between these four components. Earth and environmental scientists also consider how these relationships produce environmental change at different timescales.
