Torch-On Felt | Torch-on Roofing Felt | Torch-on Felt ...
Torch-on felt bitumen system technology includes SBS and APP modified torch-applied roofing systems. SPS is generally easier to install as it requires less heat. The felts are sold as a roll and applied using a blow torch, which melts the back of the felt onto the surface. Systems are available in a wide choice of colours to best suit a project.

Torch-on felt roofing project essentials - Roofing ...
What is Torch-on Roofing Felt Torch-on roofing, or torch-down roofing as it is also known, is a flat roof covering solution that involves three layers of modified bitumen (felt) melt-welded onto the roof surface and each other with the use of a blowtorch to create an impenetrable, waterproof seal.

Why You Should Consider Torch-On Felt | Roofinglines
Torch-on felt is generally used in combination with fibreglass underlay and plywood to create reliable, durable and weathertight flat roofs. Made from bitumen, which is widely known to have fantastic waterproofing properties, torch-on felt is typically layered to ensure properties are completely protected against the elements.

Anderson Tecnatorch SBS Torch-on Mineral Felt Capsheet is used as the final layer of the felt roofing process. It's available in rolls that are 8m long and 1m wide, with a thickness of 4.2mm (Mineral) or 3.8mm (Sand). Of course, how many rolls you need will depend on the size of the roof, so ensure you measure correctly.

A Guide to Bituminous Felts for Flat Roofing | Roof Stores
Installing the torch down roofing involves flames and melted asphalt. You will need to use your gloves and boots on occasion to roll or press down on the bitumen sheets as they bubble. Choose heat-resistant gloves and boots made of a material like Kevlar. Also cover up with long-sleeved clothing to reduce the chances of an accident.

How to Install Torch Down Roofing (with Pictures) - wikiHow
Roofing felt is most commonly used for the waterproofing of non-habitable garden buildings such as cabins or sheds. It is typically used as an underlay that sits between the surface it is being applied to and the final layer of roofing material. Roofing felt can however be applied as a final layer to a shed roof to offer further waterproofness.

Roofing Felt | Roofing Supplies | Building Supplies ...
Durability: Torch-on felt roofing is stronger than the other types of roofing felt, providing greater protection against water ingress, adverse weather, and impacts. Able to withstand whatever is thrown at it year-round, torch-on felt is a great choice for larger projects.

The Tecnatorch SBS Torch-on Mineral Felt is a high-performance, SBS elastomeric torch-on capsheet. It is suitable for use with plywood, OSB3, timber boarding, profiled metal decking and concrete/ screeded surfaces and is intended for use in built-up torch-on roofing systems.

Technatorch SBS Torch-On Mineral Felt - JJ Roofing Supplies
Roofing felt is essential to ensure your outbuilding is ready for all weathers by providing a waterproof cover to the building's roof. Ideal for an apex, flat or pent roof, shed felt and roofing membrane are durable and perfect for a newly built structure or to re-cover existing roofing material.

Roofing Felt | Shed Felt | Screwfix.com
A roofing torch is sometimes known as a gas torch and is an essential tool when applying roofing rolls to flat roofs as the heat is applied to bond the surfaces together. The felt usually has a heat dispersible membrane on the back and when the heat is applied it helps to provide a secure hold and creates a waterproof seal, which is important in preventing leaks.

Roofing Torches | Roofing Torch | Screwfix.com
Modern Torch-On Felt Roof Torch-on felt roofing simply describes the method in which the material is applied. Typical installations use a three-layer system; perforated underlay, a 2mm underlay layer, then 4-5mm felt.
