The muscle pain present in both fibromyalgia (FM) and myofascial pain syndrome (MPS) is why these two conditions are sometimes mistaken for one another or erroneously lumped together as one condition. While FM and MPS do resemble each other, they can be easily distinguished through a careful medical history and physical exam-and a correct diagnosis is a key to moving forward with an effective treatment plan.

~~Comparing Fibromyalgia and Myofascial Pain Syndrome~~ ~~Myofascial pain syndrome is a chronic pain disorder. Myofascial pain syndrome usually occurs after a muscle has been contracted over and over again. This can be caused by recurring motions used in jobs or hobbies or by stress-related muscle tension. In myofascial pain syndrome, pressure on sensitive points in your muscles (trigger points) causes pain in apparently not related parts of your body.~~

~~Myofascial Pain Syndrome and Fibromyalgia - Fibromyalgia ...~~ ~~Simply explained - it's far more complicated - is that fibromyalgia is often in people who have a genetic predisposition to pain and myofascial pain is in certain areas of the body - rather than widespread pain - and it occurs usually from trauma / repetitive trauma or ageing - degeneration~~ ~~Fibromyalgia affects millions of people.~~

~~Fibromyalgia and Myofascial Pain Syndrome | Chronic Pain ...~~ ~~This item: Fibromyalgia and Chronic Myofascial Pain Syndrome: A Survival Manual by Devin J. Starlanyl Paperback £18.89~~

~~Fibromyalgia and Chronic Myofascial Pain Syndrome: A ...~~ ~~Myofascial pain syndrome usually initiates by trauma or injury of some kind, much like fibromyalgia. These traumas and injuries can be a result of a car accident, having so much stress overwork or other issues. And, possibly because of the environment. Myofascial pain syndrome can also be a result of tiresome movement injuries or strained muscles.~~

~~Myofascial Pain and Fibromyalgia - Chronic Pain Fighter~~ ~~This website contains educational material on two medical conditions that often occur together although they are different: fibromyalgia (FM) and chronic myofascial pain and dysfunction (CMPD), also called myofascial pain syndrome. These are among the most misdiagnosed of conditions.~~

~~Fibromyalgia (FM) and Chronic Myofascial Pain and ...~~ ~~Myofascial Pain Syndrome (MPS) It is a chronic pain condition that affects the musculoskeletal system. MPS is characterized by chronic pain in multiple fascial constrictions and myofascial trigger points. The pain associated with the syndrome typically occurs in the head, shoulders, neck, legs, arms, and lower back.~~

~~Myofascial Pain Syndrome vs Fibromyalgia - Differences~~ ~~There is a strong association of chronic fatigue and CFS with pain catastrophizing. 36-38 Pain catastrophizing, defined as magnification, rumination, and feelings of hopelessness related to real or anticipated pain, was associated with the levels of chronic pain in individuals with CFS. 36 There was also a significant relationship between pain and depression. 37 Pain catastrophizing accounted for 41% of the variation in bodily pain in female CFS patients who also reported widespread pain. 38~~

~~Fibromyalgia, Chronic Fatigue, and Chronic Fatigue Syndrome~~ ~~Myofascial pain syndrome is a chronic pain condition affecting the musculoskeletal system. Most people experience muscle pain at some time that typically resolves on its own after a few weeks. But...~~

~~Myofascial Pain: Treatment, Symptoms, Causes, and More~~ ~~Myofascial pain syndrome is another form of chronic pain that can affect the entire body, particularly the face and jaw. Myofascial pain can add to the already annoying symptoms of fibromyalgia, and can contribute to disability and a poor quality of life if not diagnosed properly.~~

~~Myofascial Pain Syndrome - Fibromyalgia Symptoms~~ ~~MPS is often found in patients with fibromyalgia, but not all people who have MPS will have it as a result of fibromyalgia. Chronic Myofascial Pain (CMP) is sometimes used instead of myofascial pain syndrome. MPS is a pain syndrome that focuses on trigger points. Trigger points are tight bands of muscle and cause pain in other areas of the body.~~

~~What's the difference between fibromyalgia and myofascial ...~~ ~~Signs and symptoms of myofascial pain syndrome may include: Deep, aching pain in a muscle Pain that persists or worsens A tender knot in a muscle Difficulty sleeping due to pain~~

~~Myofascial pain syndrome - Symptoms and causes - Mayo Clinic~~ ~~ANSWER: Both of the conditions you mention are chronic pain disorders, meaning they cause pain that lasts for long periods of time and can be difficult to manage. Myofascial pain syndrome involves mainly muscular pain; whereas, fibromyalgia includes more widespread body pain, along with other symptoms, such as headaches , bowel problems, fatigue and mood changes.~~

~~Myofascial trigger point - Wikipedia~~ ~~ANSWER: Both of the conditions you mention are chronic pain disorders, meaning they cause pain that lasts for long periods of time and can be difficult to manage. Myofascial pain syndrome involves mainly muscular pain; whereas, fibromyalgia includes more widespread body pain, along with other symptoms, such as headaches , bowel problems, fatigue and mood changes.~~

~~Mayo Clinic Q and A: Understanding myofascial pain ...~~ ~~In fact, localized or regional pain is often due to myofascial pain syndrome (MPS), a rather common condition which affects certain muscle areas. MPS is often present in the fibromyalgia patient...~~

~~Myofascial Pain Syndrome vs. Fibromyalgia | Psychology Today~~ ~~Myofascial pain syndrome is a chronic condition that causes pain in the musculoskeletal system. This pain is confined to a particular area. For example, you might only feel the pain and tenderness in your right shoulder and neck. The pain is typically associated with trigger points in muscles.~~

~~Myofascial Pain: Causes & Treatment - Made for This Moment~~ ~~How it is different from fibromyalgia: The pain is generally confined to the small knots called trigger points in myofascial syndrome, while pain is widespread and in areas known as tender points in fibromyalgia. Pain does not follow a symmetrical pattern.~~

~~Chronic Fatigue Syndrome and Myofascial Pain Syndrome vs ...~~ ~~Myofascial pain syndrome denotes the sensation of muscular pain isolated to a particular area of the body. Myo is the prefix referring to muscle and fascia is the tough connective layer of tissue that covers our muscles. In its normal state, the weave like tissue of the fascia, is supple and loose.~~
