~~Fl Bird Egg Guide | Bird eggs, Bobcat, Manual~~

In general, bird egg shells are made of calcium carbonate and so the default colour is white. But other pigments can create different colours and patterns. Birds that build their nests in trees and shrubs (like dunnock and blackbird) generally have blue or greenish eggs, either spotted or unspotted. Eggs of hole-nesting birds are generally white or pale blue so that the parent birds can easily locate them and avoid breaking them.

The House Sparrow egg has a cream, green or grayish background with irregular fine brown speckles whereas the Flycatcher's eggs have an ivory or tan background with streaks or blotches of dark brown, purple or gray, heavier at the large end of the egg.

~~Bird Egg and Nest Identification | The Birders Report~~

Never pick up or handle wild bird eggs. Scents and oils from hands can contaminate the eggs and may harm the young birds or attract predators to the nest. Avoid stressing adult birds when they are brooding the eggs or adjusting their nests. If the adults become too stressed, they may abandon the nest completely and the chicks will not survive.
