The Advanced Forensics Format (AFF) is an extensible open format for the storage of disk images and related forensic metadata. It was originally developed by Simson Garfinkel and Basis Technology. The last version of AFF is implemented in the AFFLIBv3 library, which can be found on github. AFF4 builds upon many of the concepts developed in AFF. AFF4 was developed by Michael Cohen, Simson ...

AFF - ForensicsWiki

Forensic science, also known as criminalistics, is the application of science to criminal and civil laws, mainly—on the criminal side—during criminal investigation, as governed by the legal standards of admissible evidence and criminal procedure.. Forensic scientists collect, preserve, and analyze scientific evidence during the course of an investigation.

Welcome to the most comprehensive Digital Forensics and Incident Response Training resource on the Internet.

Digital Forensics Incident Response Training

The hibernation file (hiberfil.sys) is the file used by default by Microsoft Windows to save the machine's state as part of the hibernation process. The operating system also keeps an open file handle to this file, so no user, including the Administrator, can read the file while the system is running, that needs to be extracted from a disk dump or using specific tools like FTKImager.
