GHQ - General Health Questionnaire

In the GHQ-12 group, 90 and in the GHQ-28 group, 80 subjects filled in the questionnaires and agreed to participate in the second stage of the study--a psychiatric interview. The criterion validity of the GHQs was a mental health diagnosis, based on the Munich version of Composite International Diagnostic Interview.

The validity of general health questionnaires, GHQ-12 and ...
General Health Questionnaire (GHQ) Developed in the 1970s, the General Health Questionnaire is a method to quantify the risk of

The General Health Questionnaire (GHQ) is a psychometric screening tool to identify common psychiatric conditions. It has been translated and validated in at least two languages in addition to English, including Spanish and Persian. The questionnaire comprises a number of questions, each with a four-point Likert scale for responses. There are versions with 12, 28, 30 and 60 questions.

General Health Questionnaire - Wikipedia

The General Health Questionnaire
