A medium transmission line is classified as a transmission line with: A length more than 80 km (50 miles) but less than 250 km (150 miles) Operational voltage level is from 69 kV to approx 133 kV.

Capacitance effect is present. Distributed capacitance form is used for calculation purpose.

Minimum height requirements for service drop cables are determined by the local building or electrical codes, but most follow the recommendations of the National Electrical Code (NEC). In general, a service drop must be at least 12 feet above the ground (grade) as well as sidewalks and residential driveways.
