IFRS 9 also creates a fair value option for contracts that meet the own-use scope exception if certain conditions are met. This addresses the accounting mismatch that occurs when a derivative is used as an economic hedge of a commodity contract that is not accounted for as a derivative. The ASU does not include these fair value options.

Another widespread comment, however, cuts through this discussion: more than 50% of the respondents indicated in their comment letters, despite not being explicitly asked in the DP, that it was too early to propose changes to the new requirements as entities have just started to apply IFRS 9 and the impact for long-term investments is not known yet.

The debate continues over IFRS 9 (accounting for equity ...
included in IFRS 9 (2013), and is discussed in our First Impressions: IFRS 9 (2013) – Hedge accounting and transition , issued in December 2013. IFRS 9 retains, largely unchanged, the requirements of IAS 39 relating to scope and the recognition and derecognition of financial instruments.

IFRS First Impressions - assets.kpmg
Well, there’s no clear guidance in IFRS 9, but we’ve seen that — in practice — most entities discount the forgiven cash flows at the original effective interest rate (EIR) of the asset. This approach has the same result as the modification accounting under IFRS 9.5.4.3 regarding the losses recognized and

the asset amount carried forward.
