Chapter 2: Common Issues he Hydrobar Express 332 is designed to be a user-friendly, simple, and reliable bar feeder, covering a range of diameters 0.125” to 1.250” (1.250”-1.375” with bar end preparation). Although easy to use, including extremely quick changeovers and the capability for unmanned operation this unit is not flawless.

demands and requirements.

Support » LNS North America

LNS optimizes the performance of your CNC machines with the industry's most advanced bar feeders, chip conveyors, high pressure coolant systems, mist collectors and steady rest systems.

Discover the LNS Difference in your
Country

LNS has developed a proprietary database and data transfer system that enables a turning machine and an LNS barfeed to share real-time information. This capability means that, among other things, the barfeed and turning machine can analyze material usage, and then the turning machine can search your production schedule, find another part that can be made from the remaining material, and change ...
