Therapy For The Cranial

Classically, manipulations of the cranium address the sutures, the membranes and the circulation of cerebral spinal fluid. The proper functioning of these elements requires not only the mechanical harmony of the craniosacral system, but relies also on the exchange of information organized around proprioceptors, baroreceptors and chemoreceptors.

Manual Therapy for the Cranial Nerves - 1st Edition

Manual Therapy for the Cranial Nerves will make you aware of the brain as the primary target of your action as practitioner. The brain, although protected by cerebrospinal fluid, is sensitive to all variations in pressure. In this text you will find ways for modifying intra-cranial pressure, which has vascular and cerebral consequences. To function at its best, the brain requires malleability and plasticity. By manually modifying intra-cranial pressure, we obtain promising effects on the ...

Peripheral Nerves, we underlined the importance of soliciting the body's proprioceptive responses through manual therapy. This is because all tissues are endowed with a system of mechanoreceptors connected to the cerebellum and the thalamus, and it is through their agency that we obtain both local and general results. Cranial nerves supply sensitivity to the bone, periosteum, sutures and meninges. Thus, central to obtaining an effect on the dura mater ...
