A commodity market is a market that trades in the primary economic sector rather than manufactured products, such as cocoa, fruit and sugar. Hard commodities are mined, such as gold and oil. Futures contracts are the oldest way of investing in commodities. Futures are secured by physical assets. Commodity markets can include physical trading and derivatives trading using spot prices, forwards ...

The real-time energy management can effectively solve the impact of various uncertainties on the multi-energy market and ensure the instantaneous balance of energy . Meanwhile, compared with fixed energy prices, real-time energy prices are more conducive to play the role of market mechanisms [10] , and maximizing the profit incurred while considering customer participation [11] .
