Melody, chord and pedals are easier to process than reading every note individually on the page – as those who are new to the organ tend to do. Playing a tune with a chord underneath and a bass note (pedal) at the bottom may work well, especially for those who understand something about chords.

[Playing The Pedals On The Church Organ - Reluctant organist](#)

The most efficient way of choosing the pedaling is to use toe-toe-heel-heel technique. This means that we play the first note with the left toe then with the right toe. The third note is played with the left heel and the fourth – with the right heel. After that just start playing with the left toe.

The most obvious reason why pedal exercisers are an advantage is because exercise is a good thing. More than that though is the type of exercising you get and the additional health benefits you have as a result. Just by placing your feet on the pedals will remove the pressure from the back of your legs they usually get when resting on your chair.

[Advantages and Disadvantages of Pedal Exercisers](#)

Playing Organ Foot Pedals Economy of motion is the most important organ pedal technique, and using only slight movements will help you avoid wrong notes and missteps. During rests, reposition the feet and hold the toe over the next note to be played. Press the organ foot pedals with all of the toes, but don't play with a flat foot.
