Polar bear researchers need to understand what will happen to the bears when sea ice disappears. For that purpose, biologists in the field use light and compact GPS collars to track the bears' movements in real time. Because polar bears inhabit such remote and challenging habitat, collecting high quality data isn't cheap. For example, the cost ...

An ursid hybrid is an animal with parents from two different species or subspecies of the bear family. Species and subspecies of bear known to have produced offspring with another bear species or subspecies include black bears, grizzly bears and polar bears, all of which are members of the genus *Ursus*. Bears not included in *Ursus*, such as the giant panda, are expected to be unable to produce hybrids with other bears. Note all of the confirmed hybrids listed here have been in captivity, but suspe
