Pressure Ulcer and Skin Care :: Royal National Orthopaedic ...

Regularly inspecting patients ' skin to identify skin abnormalities is a key practice in pressure ulcer prevention. Skin assessment is a core element of the SSKIN care bundle for reducing the numbers of pressure ulcers (Whitlock, 2013). This recognises that, even in the absence of a structured risk assessment, changes in skin signal increased risk and may predict the occurrence of deeper pressure damage.

The Department of Health (2018) pressure ulcer

Access Free Pressure Ulcers And Skin Care

guidance identifies that a pressure ulcer is a localised injury to the skin and/or underlying tissue usually over a bony prominence. The 4 main factors implicated are interface pressure, shear, friction, and moisture.

NHS England » React to Red – Reducing pressure ulcers in ...

A pressure ulcer occurs when the skin and underlying tissue gets damaged by unrelieved pressure.

Essentially the skin, its blood supply and underlying tissue are squashed between the hard surface (the cause of pressure) and the underlying bone.

Maintaining Skin Integrity and Preventing Pressure

Decubitus ulcers are caused by continuous pressure or friction on the skin. They 're also called pressure ulcers and pressure sores. These ulcers often develop on bony areas, because the bones...

Skin Ulcer Types, Symptoms, Causes, Diagnosis, and Treatment

The GP or district nurse may refer the person to a tissue viability nurse (TVN). TVNs specialise in wound care and can assess the person and make a care plan to manage their pressure ulcers. The TVN or district nurse will record the level of skin damage (the category or grade) and report any pressure ulcers with an open wound to a central database.

make up SSKIN Surface: make sure your patients have the right support

Using SSKIN to manage and prevent pressure damage
| NHS ...

Pressure ulcers are caused by three main things:

Pressure - the weight of the body pressing down on the

skin Shear - the layers of the skin are forced to slide

over one another or over deeper tissues for example

when you slide down or are pulled up, a bed chair or

when you are transferring to and from your wheelchair.

Friction - rubbing the skin
