Phlebotomy Procedure - E Phlebotomy Training

Drawing a blood sample from a patient is the main job for a phlebotomy technician. Patients are usually nervous if they've never had it done before, or sometimes they have a phobia of needles or doctor's offices. It is important for the phlebotomist to follow a step-by-step procedure to ensure consistency and to make the patient comfortable.

Step By Step Procedure for How a Phlebotomist Draws Blood

The most common procedure is by performing a venipuncture (collecting blood from veins). In certain cases, blood may be collected by finger stick sampling (when a minute quantity of blood is required) or by heel stick sampling (in case of newborn baby or infant). A person who performs phlebotomy is called a phlebotomist.
