nursing interventions include the prevention of pulmonary thromboembolism and early antiplatelet therapy.

(PDF) Nursing Interventions and Rehabilitation Activities ...

Rehabilitation nursing begins with immediate preventive care in the beginning stages of accident or illness, is continued through the restorative stage of care, and involves adaptation of the whole being to a new life. The rehabilitation nurse provides care, education, and support for the patient and the family.

Rehabilitation nurses work with patients
who are recovering from chronic illnesses,
injuries or disabilities. Nurses help
patients transition to further independence,
build strength and mobility, and adapt to
their situations in order to care for
themselves as much as possible.
