Contemporary management of advanced renal cell carcinoma.

An increasing number of small renal masses (SRMs) with heterogeneous histology and clinical behaviour are being detected with modern radiologic imaging. Although surgical removal is the standard of care for small renal tumours, alternative minimally invasive and conservative treatment options are possible in selected patients with shorter life expectancy.

Renal Cancer: Contemporary Management
by Libertino, John A ...

With the advent of widespread cross-sectional imaging there has been a surge in incidental detection of small renal masses (SRMs) and renal cell carcinoma (RCC) is now the seventh most common cancer in the UK. Whilst surgical excision for larger renal tumours remains the standard of care, the management of SRMs (stage T1a defined as <4cm) remains contentious due to the uncertainty about the diagnosis, variable malignant potential and
