STRYK System Improvement /

NAV/SQL Performance Field Guide

A common and pretty good Best Practice

for a SQL Server running NAV is: 1

logical CPU (Core/Thread) per 25

Users/Sessions For example, you run

NAV with 100 Users you ' ll need 4 CPU

(as it is with Best Practices, that ' s just an

educated guess, which may need to be

adjusted to the individual requirements).

The basics. A NAV "BLOB" data-type is actually the "image" data-type in SQL Server (SQL also features other LOB types as "text" or "ntext" but they aren't relevant for NAV). [ Out of the box, NAV flags a "BLOB" field with the property "Compressed" = TRUE. If this is enabled, NAV uses a compression algorithm to save the data more compact. Have in mind that SQL Server does not recognize this "compression", so if you're using BLOB to transfer binary data from NAV to other SQL systems
