The Nutrition Desk Reference: Garrison, Robert H., Somer ...

Dietary Reference Values (DRVs) comprise a series of estimates of the amount of energy and nutrients needed by different groups of healthy people in the UK population. Included within this definition are three types of estimates: Reference Nutrient Intakes (RNIs), Estimated Average Requirements (EARs) and Lower Reference Nutrient Intakes (LRNIs). RNIs are used for protein, vitamins and minerals, and are an estimate of the amount that should meet the needs of most of the group to which they ...
