At RCOT, we have pulled together a description of what self-management means for occupational therapists, to start the conversation. We cannot expect people to self-manage until they have the correct information, and as a profession we are in an ideal position to support people with more complex needs, or indeed mentor others in their approach.

The occupational therapist will use activity analysis and a graded approach to activities which cause the client anxiety. This allows the occupational therapist to observe the client in activity, support them to carry out the activity and to make the activity more or less challenging depending on the need. The occupational therapist breaks down identified anxiety provoking activities and will agree with the client one part of the activity they feel they could try.
