Unit 1 Numbers and the number system | Teaching Resources

The parsec is a unit of length used to measure the large distances to astronomical objects outside the Solar System. One parsec is approximately equal to 31 trillion kilometres, or 210,000 astronomical units, and equates to about 3.3 light-years. A parsec is obtained by the use of parallax and trigonometry, and is defined as the distance at which one astronomical unit subtends an angle of one arcsecond. This corresponds to approximately $648000/\pi$ astronomical units, i.e. $1 \text{ pc} = 1 \text{ au}/\tan$. The ...

Using Numbers in English. 1.4.1 Numbers can be either cardinal or ordinal. Cardinal numbers are the normal numbers like 1 (one), 2 (two), 3 (three), and so on. We can write them in words (one) or figures (1). They tell us how many of something there are, e.g. 'There are two people in the classroom'. They are also used to tell the time, e.g.
