weather and climate. Although technically a first edition, it consists entirely of lab exercises that have been used (and refined as necessary) for over 20 years in the Introduction to Weather and Climate course at Salisbury University. A particular strength of the manual is that it covers the key topics with more in-text explanation and instruction than is found in most other manuals.

Netoff, Weather and Climate Lab Manual, Chapter 1. Related Reading 01. We will begin our laboratory study of weather and climate with a brief look at maps. To a geographer, a map is an essential tool. In fact, a map may well have been one of the very first intellectual tools. Maps help us better understand the "where" of things as in:
